

Bhavan Gupta

Software Engineer

bhavangupta@gmail.com — 9971639333 — New Delhi — linkedin.com/in/bhavangupta-dev — github.com/bg12345

PROFESSIONAL SUMMARY

Software Engineer with experience building scalable backend systems using Python as a primary language and Go for high-performance services. Skilled in REST APIs, microservices, eKYC and fintech workflows, payment integrations, and database optimization using Django, Flask, Gin, and GORM. Strong in backend development, Docker-based deployment, and reliable transaction and onboarding systems.

WORK EXPERIENCE

Software Engineer

Apr 2025 – Apr 2026

Invisify Technologies Private Limited, New Delhi, India

- Developed and optimized **Golang microservices** for fixed deposit and stock transaction workflows, improving API response time by **20–25%** through **SQL tuning**, indexing, and backend optimization.
- Designed **RESTful APIs** for SIP workflows using **Go, Gin, and GORM**, including **Razorpay** integration for mandate creation, payment initiation, and automated transaction processing.
- Containerized microservices using **Docker** to standardize deployments, simplify service packaging, and improve consistency across development and production environments.
- Built **FSM-based** user journey flows for multi-step financial workflows, improving state transitions, business rule validation, and backend maintainability.
- Improved SIP scheduling reliability through better **cron** execution, exception handling, and retry logic, reducing transaction failures by **10–12%**.
- Engineered the **eKYC onboarding pipeline** using **Go microservices**, reducing customer onboarding turnaround time by **25–30%**.
- Implemented high-performance **fuzzy search** across asset classes by optimizing query pipelines and backend search logic.
- Developed an automated **invoice generation microservice** that reduced manual effort by **70%** and improved reporting accuracy.

Junior Software Engineer

May 2024 – Apr 2025

Almondz Global Securities Ltd., New Delhi, India

- Engineered the end-to-end **Django-based eKYC backend workflow** covering **PAN validation**, document parsing, biometric verification, and exchange submission APIs, improving account opening success by **~40%**.
- Designed and maintained **Django-driven** customer onboarding logic aligned with **SEBI, NSE, and BSE compliance** requirements as a primary backend contributor for eKYC modules.
- Developed **Django** back-office modules for personal detail updates, bank account management, account closure requests, and related internal operations.
- Implemented segment activation workflows in **Django** for **Mutual Funds, Currency, and Equity Derivatives** with validation rules, status tracking, and API integrations.

Machine Learning Intern

Jun 2022 – Nov 2022

BeGig Pvt. Ltd., Gurugram, India

- Developed a content-based **recommendation system** using **machine learning** to match freelancers with projects based on skill similarity and profile relevance.
- Built a real-time chat backend using **Flask** and **WebSocket**, increasing platform user engagement by **30%**.

TECHNICAL SKILLS

- **Languages:** Python, Golang (Go)
- **Frameworks:** Django, Flask, Gin, GORM, REST APIs, Microservices
- **Databases:** PostgreSQL, MySQL, MongoDB, Redis
- **Tools:** AWS S3, AWS EC2, AWS Lambda, Git, Docker, Linux, WebSocket
- **Domain:** eKYC Systems, Payment Gateway (Razorpay), Trading Platforms, Account Aggregator, Agile, CI/CD, FSM

PROJECTS

Climate Trends Visualization — [GitHub](#): Interactive Golang and JavaScript app for climate data visualization with dynamic filtering and charts, containerized using Docker and deployed on AWS EC2.

OCR System — [GitHub](#): Python OCR system using OpenCV and Tesseract for scanned document text extraction.

EDUCATION

B.Sc (Hons) Mathematics, Motilal Nehru College, Delhi University

2019 – 2022

CERTIFICATIONS

Python Programming Expert, Edureka

Mar 2023
